EMERGENCY LIGHTING

Churches Fire & Security are experts in the fire safety sector, able to provide industry-standard emergency lighting products and services.

DESIGN AND INSTALLATION

Clear and efficient evacuation products and procedures save lives. Churches Fire & Security provides fully-compliant emergency lighting signs and systems tailored to your building and its escape routes.

Emergency lighting is a requirement of The Regulatory Reform (Fire Safety) Order 2005 for non-domestic buildings and Houses of Multiple Occupancy. Our service technicians look at your company's individual requirements in line with your fire risk assessment to design and install emergency lighting products and systems tailored to you.

Our trained staff are proactive in their approach to compliance ensuring that all emergency lighting we install conforms to BS 5266 and will be fail-safe in the event of an emergency.

SERVICING AND MAINTENANCE

Churches Fire & Security recommends regular testing, servicing and maintenance of your lighting systems. We advise that all emergency lighting systems should be tested at least monthly, by isolation of electricity supply, which will be demonstrated by a member of our team.

Our service and maintenance contracts are designed to ensure that your emergency lighting equipment is fully-functioning and that your business remains compliant.

Regular service visits are booked in advance and are undertaken by designated regional technicians who are often able to provide a first-time fix to any issues or problems your system may have.

Get in touch with Churches Fire & Security to discuss how we can fulfil all of your fire safety requirements. Contact us on **0345 646 1760** today.
