KITCHEN SUPPRESSION

PROTECTION FOR YOUR COMMERCIAL KITCHEN

We know that commercial kitchens are one of the greatest fire risks in any premises, containing specialist equipment that is expensive to replace. If you have a commercial kitchen in your building, a kitchen suppression system is the most effective way to guard it against fire.

Trust Churches Fire & Security with the installation, servicing and maintenance of your kitchen suppression systems. Contact us today on **0345 646 1760** to discuss your requirements.

KITCHEN SUPPRESSION

These systems operate automatically, using wet chemicals to reach and suppress fires that other methods cannot. They are safer and more effective than fire extinguishers or fire blankets and allow for a quick clean-up after activation. This means your kitchen can be up and running again as soon as possible.

Churches Fire & Security specialise in kitchen suppression. We deliver a comprehensive range of services that you can trust.

Installation

Our fully-trained technicians work with you to design and install a kitchen suppression system that meets your needs. People and equipment will be safer and your business can be fully operational after an activation in the shortest time possible.

We are aware that fires can easily start in a commercial kitchen and that it is an essential part of your business that you cannot afford to have out of action. This is why we recommend and install kitchen suppression systems as standard, using only the best products. The safety benefits of kitchen suppression systems are such that they could significantly reduce insurance premiums, saving you money and providing peace of mind.

Service and Maintenance

Churches Fire & Security is a widely-recognised fire safety company that specialises in kitchen suppression. We provide a full servicing package to ensure that your kitchen suppression system is always in full working order. Our technicians, qualified in both servicing and design, are available 24/7 in the event of an emergency. This means that your kitchen can be assessed for damage, repaired, and working again in no time any time of the day or night.

All servicing is performed according to the manufacturer's specification, with only genuine, approved parts. We take pride in the quality of our work, because your safety is our highest priority.

Ansul and Amerex

Our technicians are highly skilled and fully qualified to install and maintain both Ansul and Amerex systems. We only use the highest quality, industry-standard products, and are proud to partner with these notable companies. You can be assured that you will always have the best choices available to you.

With both Ansul and Amerex products, fires are quickly detected and a suppression agent is discharged, forming a solid layer of foam that cuts off oxygen from the flames.

Our technicians can quickly recharge the system after it has been activated, so your kitchen can be safe to use again on the same day.

All of the Ansul and Amerex systems we install meet the UL300 standards and they are approved by LPCB (LPS1223).
