SPRINKLERS

AUTOMATIC FIRE DETECTION AND SUPPRESSION

Sprinkler systems are designed to operate automatically, detecting and suppressing fires by discharging water in the area of protection.

They are a powerful tool for fighting fires, keeping your property, staff and assets safe.

Trust Churches Fire & Security with the installation, servicing and maintenance of your sprinkler systems. Contact us today on 0345 646 1760 to discuss your requirements.

SPRINKLERS

Typically standard fire safety requirement in shopping centres, distribution centres, warehouses and factories, sprinklers can increase evacuation time for buildings, minimise smoke and fire damage and reduce insurance premiums.

At Churches Fire & Security, we are sprinkler system specialists. We provide products and solutions tailored to your organisation's requirements to ensure safety from fire.

Design and Installation

Our Loss Prevention Council (LPC) qualified engineers work with you to design a sprinkler system that is state-of-the-art, fully compliant and customised to your needs, whatever the building size. A well designed and installed sprinkler system quickly detects and suppresses a fire within a short period of time, allowing extra time for evacuation, minimising damage and maximising safety. Our sprinkler systems are able to sound the alarm and alert the emergency services to a fire. They are often able to fully extinguish the fire by themselves.

Each individual sprinkler in a system works autonomously, releasing water when exposed to heat at predetermined temperatures. This enables our sprinkler systems to automatically combat the fire at its early stages, discharging water wherever the fire moves or spreads.

Churches Fire & Security uses the latest CAD and Full Hydraulic Calculation design software to design and modify systems to the latest rules and the highest of standards. In order to maintain these standards, we are regularly audited by our third-party accreditation organisation.

Service and Maintenance

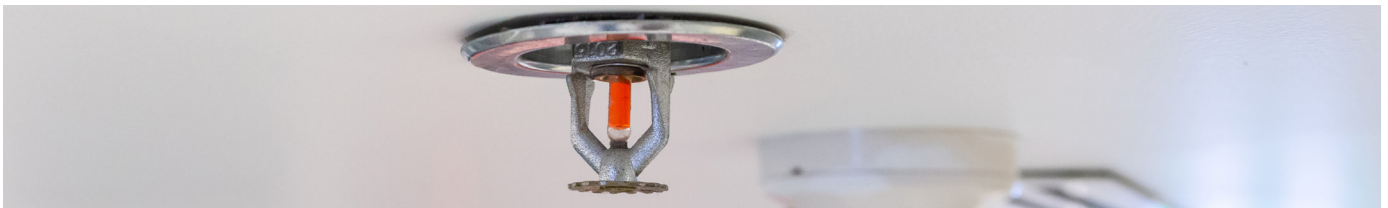

Our sprinkler systems are built to last, with our service team continuing to provide maintenance and general upkeep after installation. This means that our customers can be assured that their sprinkler system will be in full working condition, keeping their company safe for years to come.

Our technicians are experienced, highly skilled and trained to carry out immediate system repairs themselves. Each technician has their own van, with all the necessary equipment to provide on-site repairs almost every time. They undergo regular training to make sure they're always up-to-date with the latest regulations.

Accreditations

We value our customers' trust very highly, which is why we always adhere to the latest industry standards. We are certified under the Loss Prevention Scheme LPS 1048 Level 3. This ensures that the sprinkler systems we install and maintain meet the highest of standards.

Churches Fire & Security are members of the British Automatic Fire Sprinklers Association (BAFSA), actively promoting the use of automatic sprinkler protection.

Get in touch with Churches Fire & Security to discuss how we can fulfil all of your fire and security requirements. Contact us on 0345 646 1760 today.
